INDEX TO VOLUME 33

Acetobacter xylinum, Cultivation of cellulose-splitting bacteria on membranes of 249
Acid-fast bacteria from human skin. Abs 450
Acid production by the *Escherichia-Aerobacter* group of bacteria as indicated by dissolved metallic iron 185
Acquisition, The, of heterophile antigen by living bacteria. Abs 68
Actions taken by the Second International Microbiological Congress in London, 1936, regarding bacteriological nomenclature. Abs 15
Action, The, of air under pressure in the oxidation of acetylmethylcarbinol to diacetyl in butter cultures. Abs 92
——, The, of aldehydes on purified diphtheria toxin. Abs 52
——, The, of microörganisms on fats. Abs 98
Actions taken by the Second International Microbiological Congress in London, 1936, regarding bacteriological nomenclature 445
Adsorbed calcium on colloidal clay and an accessory growth factor in laboratory production of *Rhizobium* cultures. Abs 80
Adsorption of bacteria by inert particulate reagents 401
Aerobacter aerogenes, A comparison of the metabolic activities of, *Eberthella typhi* and *Escherichia coli* 145
—— *indologenes*, The intermediate dissimilation of glucose by 603
Albrecht, William and McCalla, Thomas M. Adsorbed calcium on colloidal clay and an accessory growth factor in laboratory production of *Rhizobium* cultures. Abs 80
Allison, James B., Anderson, J. A., and Cole, William H. The method of electrical conductivity applied to studies on bacterial metabolism. Abs 645
Anaerobic, The, bacteria of the soil—a tillable field. Abs 76
Anderson, D. Quentin, ZoBell, Claude E., and Smith, W. Whitney. The bacteriostatic and bactericidal action of Great Salt Lake water 253
Anderson, J. A., Allison, James B. and Cole, William H. The method of electrical conductivity applied to studies on bacterial metabolism. Abs 645
Andrews, Margaret M., Carpenter, Charles M., and Lange, Lois E. Acid-fast bacteria from human skin. Abs 450
Animal, The reservoirs of brucellosis. Abs 39
Anolis equestris, A contagious tumor-like condition in the lizard, as induced by a new bacterial species *Serratia anolium* (sp. n.) 369
Antibiosis between *Escherichia coli* and *Salmonella schottmuelleri*. Abs 38
Antigenic and biochemical properties of staphylococci. Abs 51
Antigens for the complement-fixation test with antigonococcus serum. Abs. 450
Antigens for the complement-fixation test with antigonococcus serum. A preliminary report. Abs 644

Antitoxic immunity in the prophylaxis and treatment of staphylococcal infections. Abs 48
——, The, titers of human subjects following immunization with combined diphtheria and tetanus toxoid, alum precipitated. Abs 53
Application of semisolid media to the study of the *Clostridium butyricum* group. Abs 22
Aschner, M. Cultivation of cellulose-splitting bacteria on membranes of *Acetobacter xylinum* 249
Ashby, Gerald K., Hedges, C. C., and Gibbons, E. H. Effect and efficiency of germicides and fumigants on microörganisms associated with the baking industry. Abs 96
Attempts to differentiate the species of *Rhizobium* by physiological methods. Abs 81
—— to reveal sex in bacteria; with some light on fermentative variability in the *Coli-aerogenes* group 315
—— to transmit acute anterior poliomyelitis to rabbits, guinea-pigs, rats, mice, chickens and ferrets with and without depression by X-rays. Abs 574

B. anthracis, A reaction with iron compounds for the determination of, and of its pathogenicity 197
Bacillus cereus, The relation of *Bacillus siamensis* and similar pathogenic spore-forming bacteria to 435
—— *siamensis* and similar spore-forming bacteria to *Bacillus cereus*, The relation of 435
Bacteria, Adsorption of, by inert particulate reagents 401
—— and the nitrogen metabolism of termites. Abs 95
——, Growth factors for. III. Some nutritive requirements of *Lactobacillus delbrucki* 207
——, —— —— ——. IV. An acidic ether-soluble factor essential for growth of propionic acid bacteria 227
—— in sea water, Viability of 389
——, pathogenic spore-forming, The relation of *Bacillus siamensis* and similar, to *Bacillus cereus* 435
Bacterial cultures, A simple method for preserving, by freezing and drying .. 411
—— dissimilation. Abs 100
—— growth, Studies on the effect of synthetic surface-active materials on. II 479
—— spores, The water content of 323
—— type transformation. *Micrococcus tetragenus* infection. IV 499
—— variation as studied in certain unstable variants 349
—— variation: further observations on variant forms of *Bacillus megatherium*. Abs 19
Bacterial variation, The significance of. *Micrococcus tetragenus*. V 513
Bactericidal action of Great Salt Lake water, The bacteriostatic and 253
Bacteriological, A, survey of a swimming pool treated with silver. Abs 89
—— nomenclature, Actions taken by the Second International Microbiological Congress in London, 1936, regarding 445

Bacteriology laboratory, The insect menace in the 410
——, The, of experimental tuberculosis in guinea pigs. Bacteremia. Abs 56
Bacteriophage, Variations in the filtrability of different races of 496
Bacteriostatic, The, action of brilliant green in solid media on members of the colon-aerogenes group and their intermediates. Abs 88
——, The, and bactericidal action of Great Salt Lake water 253
Bacteroides, The gram-negative, of the intestine 420
Bailey, John Hays. The types of hemolytic streptococci in grammar school children. Abs 71
Baldwin, I. L., Longley, B. J., Berge, T. O., and VanLanen, James M. Changes in the infective ability of rhizobia and *Phytomonas tumefaciens* induced by culturing on media containing glycine. Abs 29
—— and Roberts, J. L. The effect of certain colloids upon endospore formation by *Bacillus subtilis*. Abs 37
Barbados "molasses", Microorganisms causing fermentation flavors in cane sirups, especially 177
Bartram, M. T. and Black, L. A. Productivity of media used in the isolation of *Escherichia-Aerobacter* from milk. Abs 16
—— and ——. Reaction of *Escherichia-Aerobacter* from milk on Eijkman medium. Abs 16
Batchelor, Harold W. Some factors affecting the preparation and use of silica-gel media for the growth of non-symbiotic nitrogen-fixing bacteria. Abs 43
Beale, H. P. The intracellular crystallization of Stanley's tobacco virus proteins. Abs 336
Beard, Paul J., Carlson, J. M., and Chambers, R. D. The survival of *Eberthella typhosa* in soil. Abs 74
Beckwith, T. D., and Donovick, S. E. An open system respirometer for study of the gaseous metabolism of microorganisms 291
Behrens, C. A., Schwenger, L. B., and Reeves, J. L. The production of immunity with purified suspensions of the rabies virus. Abs 42
Bengtson, Ida A. Studies on the cultivation of *Dermatomycoses mycetoma* in vitro. Abs 42
Benham, Rhoda W. The differentiation and diagnostic characteristics of four fungi causing systemic infections. Abs 136
Berens, Conrad, Chapman, George H., Curnio, Lillian, and Wilson, Edith L. The pathogenic staphylococcus: its isolation and differentiation from non-pathogenic types. Abs 148
Berens, Conrad, Chapman, George H., Lieb, Clarence W., and Curnio, Lillian. The isolation of probable pathogenic staphylococci 330
Berge, T. O., Longley, B. J., VanLanen, James M., and Baldwin, I. L. Changes in the infective ability of rhizobia and *Phytomonas tumefaciens* induced by culturing on media containing glycine. Abs 29
Berger, Julius, Johnson, M. J., and Peterson, W. H. Proteolysis by mold enzymes. Abs 104
Berry, George P. Discussion of problems concerning the Third International Congress for Microbiology. Abs 449

Antitoxic immunity in the prophylaxis and treatment of staphylococcal infections. Abs 48
——, The, titers of human subjects following immunization with combined diphtheria and tetanus toxoid, alum precipitated. Abs 53
Application of semisolid media to the study of the *Clostridium butyricum* group. Abs 22
Aschner, M. Cultivation of cellulose-splitting bacteria on membranes of *Acetobacter xylinum* 249
Ashby, Gerald K., Hedges, C. C., and Gibbons, E. H. Effect and efficiency of germicides and fumigants on microörganisms associated with the baking industry. Abs 96
